

ADARSH SINGH

Noida, Uttar Pradesh, India — Open to relocation anywhere
+91-6386247822 — singhadadarsh9240@gmail.com — LinkedIn — GitHub — LeetCode

Education

JSS Academy of Technical Education (AKTU)

Oct 2023 – Oct 2027

Bachelor of Technology in Information Technology (CGPA: 7.54)

Noida, India

Work Experience

Google Developer Student Clubs (GDSC)

Apr 2025 – Present

Core Team Member (Web Development)

Noida, India

- Engineered full-stack features including event registration and secure user authentication, successfully onboarding 500+ students and increasing event participation by 40%.
- Led 5+ technical workshops on web development for 200+ attendees, managing agile project lifecycles utilizing Git/GitHub for version control.

Projects

Q-Ecosystem | Secure B2B SaaS Platform | Next.js 14, Turborepo, Supabase, Clerk

Feb 2026 – Apr 2026

- Architected a Turborepo architecture of 4 micro-apps (**Qrento**, **Q-Store**, **Q-Delivery**, **Q-Partner**), achieving 60% code reuse and accelerating CI/CD pipelines by 45%.
- Provisioned PostgreSQL with strict Row Level Security (RLS) for B2B data isolation; enforced RBAC and JWT handshakes via Clerk API Gateway.
- Mitigated bot abuse via Sliding Window rate-limiting; streamlined route groups for Zero-CLS, achieving sub-80ms p99 latency and sub-200ms FCP.

AI Resume Builder | LLM-Powered Platform | React, Node.js, MongoDB, Gemini API

Jan 2026 – Mar 2026

- Integrated Generative AI models utilizing Server-Sent Events (SSE), delivering sub-second first-token latency and reducing perceived generation wait times by 70%.
- Designed an advanced resume-scoring algorithm utilizing TF-IDF and regex heuristics, achieving 92% keyword extraction accuracy against corporate job descriptions.
- Refactored complex React component trees and caching layers, slashing client-side PDF rendering memory footprint by 40% without blocking the main thread.

PawAlert | Distributed Gov-Tech SaaS | Node.js, Express, PostgreSQL, Redis

Dec 2025 – Feb 2026

- Engineered a high-throughput civic backend utilizing PostGIS and Redis, processing real-time stray tracking data with sub-50ms geolocation query latency.
- Architected fault-tolerant webhook integrations via Redis message brokers for municipal reporting, ensuring a 99.9% delivery rate of vaccination telemetry.
- Scaled node infrastructure to handle 5,000+ concurrent connections via enhanced WebSocket synchronization, slashing map-state staleness by 80%.

Achievements

Competitive Programming (LeetCode): Peak Rating: 1637 (Knight), solved 554 algorithmic problems across arrays, graphs, and DP with a 248-day max streak.

Certifications

Oracle: Cloud Infrastructure 2025 Certified AI Foundations Associate

Oct 2025

DeepLearning.AI: Building AI Voice Agents for Production

Feb 2025

Google Cloud: Introduction to Generative AI

Sep 2025

Technical Skills

Core CS: Data Structures & Algorithms, OOP, System Design, DBMS, Operating Systems, Computer Networks

Languages: C++, JavaScript (ES6+), TypeScript, Python, SQL, HTML5/CSS3

Frontend & Architecture: React.js, Next.js 14/15, Tailwind CSS, ShadCN UI, SCSS, Turborepo (Micro-frontends)

Backend & APIs: Node.js, Express.js, RESTful APIs, API Design, Microservices, WebSockets, Server-Sent Events (SSE)

Databases & Caching: PostgreSQL (PostGIS), MongoDB, Redis, Supabase, Mongoose ODM, Indexing, Query Optimization

AI / LLM: OpenAI API, Gemini API, Prompt Engineering, Context Management, LLMops, AI Voice Agents

DevOps, Auth & Tools: Git, Docker, CI/CD (GitHub Actions), Linux, Vercel, Clerk (Zero-Trust), RBAC, OAuth, JWT
